

Micronel Statement for Peace

Micronel supplies its products as explained on our webpage under "Compliance & Integrity":

Compliance & Integrity

We consistently comply with all applicable regulations, in particular export control regulations. We reject fraud, money laundering, corruption and the use of our products in war materials. We respect fair trade and human rights along the entire value chain and maintain responsible corporate governance.

NOT in war material

This means:

- a) NO active warfare, e.g. not for personal protection equipment that can also be used for offensive warfare, e.g. not for *Future Soldier 2030* (however, Switzerland's *vision* and the *Army 2030* brochure are focused solely on defense)
- b) In NO armed systems, installations, machines, devices, vehicles, aircraft, drones, ships, submarines, etc.

It is our responsibility to know the end use of our products BEFORE the customer places an order so that we can verify the true use of our products.

The EUC (*End User Certificate*) on our website serves this purpose and allows us to decide whether the application of our products is ethical and whether there is a possibility of dual use, which is subject to the Swiss Export Control Act (SECO).
